EXPERIENCE

Orydle

Jan 2026 – Apr 2026

Software Engineer Intern

Remote

- Built cloud IDE backend with **FastAPI** + **PostgreSQL**, async architecture, **WebSocket streaming**, and distributed workflow execution with checkpointing and fallback paths.
- Implemented **GitHub API** integration for automated codebase crawling and traversal, including repository ingestion, branch-level indexing, and context retrieval pipelines across entire codebases.
- Engineered full backend data pipeline, including chunking, vector indexing, and reranking, for semantic code search; improved backend throughput by **30%** via optimized async design.
- Designed structured output schemas and prompt optimization strategies reducing **external API cost by 25%**; built fallback and retry logic for agent reliability.

DevX

Dec 2025 – Jan 2026

AI/ML Intern

Surat

- Built production **ML forecasting engine** (SARIMAX + Scikit-learn) with end-to-end feature engineering pipeline; improved prediction accuracy by **70%**.
- Developed scalable **FastAPI** inference pipelines with async endpoints; implemented **Pandas** + **NumPy** preprocessing reducing data preparation time by **40%**.
- Designed and maintained **eval sets and regression tests** to catch model drift pre-deployment; established structured quality scoring per workflow.
- Built automated business report generation system using **Hugging Face Transformers**; documented experiments, prompt templates, and evaluation results.

Open Source Contributor

2026

Traceroot AI, TracerCloud & AgentWrapper

Remote

- Merged **PR #1152** to traceroot-ai/traceroot, shipping a version badge feature reviewed and approved by project maintainers.
- Merged **PR #1235** to traceroot-ai/traceroot, fixing a trace **error_count** deduplication bug using **ClickHouse SQL** and an error leaf heuristic to improve production observability data accuracy.
- Merged **PR #2761** to Tracer-Cloud/opensre, adding **types-PyYAML** stubs to dev dependencies and enabling full mypy type-checking of PyYAML usage with no runtime changes.
- Merged three PRs to AgentWrapper/agent-orchestrator: a preflight validation step checking the reviewer binary is on PATH before creating review runs (**PR #2767**); assembled prompt byte metrics surfaced during agent spawn (**PR #2839**); and a tmux liveness fix so exited agents are no longer misreported as alive behind a surviving keep-alive shell (**PR #2831**).
- Debugged issues, wrote tests, and iterated through **GitHub code review and CI** to land production-ready changes in collaboration with maintainers.

PROJECTS

ClaimWise | *Python, FastAPI, LangChain, PostgreSQL, Supabase, Next.js*

[GitHub](#)

- Full-stack **AI SaaS platform** with **FastAPI** backend, **Supabase** auth + storage, vector DB integration, and **Next.js** frontend; reduced pipeline latency by **60%**.
- Engineered document ingestion pipeline, including PDF parsing, chunking, embedding, and reranking, with structured coverage extraction and regression eval sets.

Jasper | *Python, FastAPI, LangGraph, Docker, CI/CD*

[GitHub](#)

- Independently architected **autonomous agent** end-to-end with multi-step LLM pipelines, tool calling, state machines, human-in-the-loop checkpoints, and audit logging; **100%** deterministic execution across test cases.
- Published as **PyPI package** (**jasper-finance**); deployed via **Docker** with **CI/CD** pipelines and structured logging.

TECHNICAL SKILLS

Languages: Python, Java, SQL, C

AI / ML: LangGraph, LangChain, RAG, Autonomous Agents, Tool Calling, Prompt Engineering, Structured Outputs, Embeddings, Vector Search, Hallucination Mitigation, Scikit-learn, TensorFlow, Hugging Face Transformers

Backend: FastAPI, RESTful APIs, WebSockets, Asynchronous Programming, Microservices, Distributed Systems, Message Queues, System Design, API Design

Data Engineering: ETL Pipelines, Feature Engineering, Pandas, NumPy

Databases: PostgreSQL, Supabase, FAISS, Chroma, ClickHouse, Query Optimization, Indexing

Cloud & DevOps: AWS EC2, Docker, GitHub Actions, Git, CI/CD, Web Crawling

Testing & Tooling: pytest, Postman, Unit Testing, Logging, Debugging

EDUCATION

Manipal University Jaipur

Jaipur, Rajasthan

B.Tech in Computer Science and Engineering (Data Science), CGPA: 7.5/10

Expected 2027
